A testament to our
Gold Standard in
Exceptional patient care.

- Country's **first pediatric hospital**, Rainbow Children's Hospital, Banjara Hills, Hyderabad **awarded JCI Accreditation**
- Country's **first standalone fertility center** BirthRight Fertility, Kondapur, Hyderabad awarded **JCI Accreditation**

Our Vision

Our aim at Rainbow Children's Hospital is to provide **highest standards of care for the mother, foetus, new born and children** so that none of them is deprived of a tertiary care facility.

Our Mission

The measure of our success is in the number of smiling faces.

Awards & Accolades

Guinness Book of World Record Holder for the largest gathering of people born prematurely – 2016

South East Asia's smallest baby born at Rainbow Children's Hospital, Hyderabad - 2018

No.1 Paediatrics, and Gynaecology & Obstetrics Hospital India Best Hospital Ranking - 2023

The Week and Hansa Research Survey – **India's No.1 in Pediatrics** standalone Hospitals – 2021 & 2022

BirthRight Fertility by Rainbow Hospitals is the **first accredited Fertility hospital in India**

First & Only Pediatric hospital in India to get JCI accredited

India's **first NABH accredited corporate children's hospital**

12 of Rainbow Children's Hospital are NABH Accredited

Awarded for "Excellence in Fertility" in Elets Healthcare Innovation Award - 2023

Pharmacie De Qualite' certification from the Bureau of De Veritas – Rainbow Children's Hospital, Banjara Hills – 2017

Awarded Best Children's Hospital by CNBC TV 18 and ICICI Lombard - 2010, 2014, 2018

VCCircle – Best pediatric Hospital (under Best Single Specialty Healthcare Company Category – 2015, 2016

For Four Consecutive Years 2021 - 2024

Ranked No.1 Pediatric Hospital, India by Times Critical Care Survey – 2023, 2022, 2021

Ranked No.1 Obstetrics and Gynecology Hospital in India Critical Care Survey – 2021

The Best Multi Specialty Hospital in Fertility and IVF category 2018-2019

Rainbow Journey

1999-2010

Established standalone pediatric specialty hospital concept

Integrated perinatal services within the children's hospital

Expansion within Hyderabad and a new city - Vijayawada

2011-2013

Nurtured perinatal services

Enhanced Pediatric multi specialty and tertiary care services

Investment by the CDC Group, UK

2014-2017

Foray into newer cities – Bengaluru and New Delhi

Hub and Spoke model nurtured in Hyderabad

Second tranche of investment by the CDC Group, UK

2018-2023

Successful listing on the stock exchanges - NSE and BSE

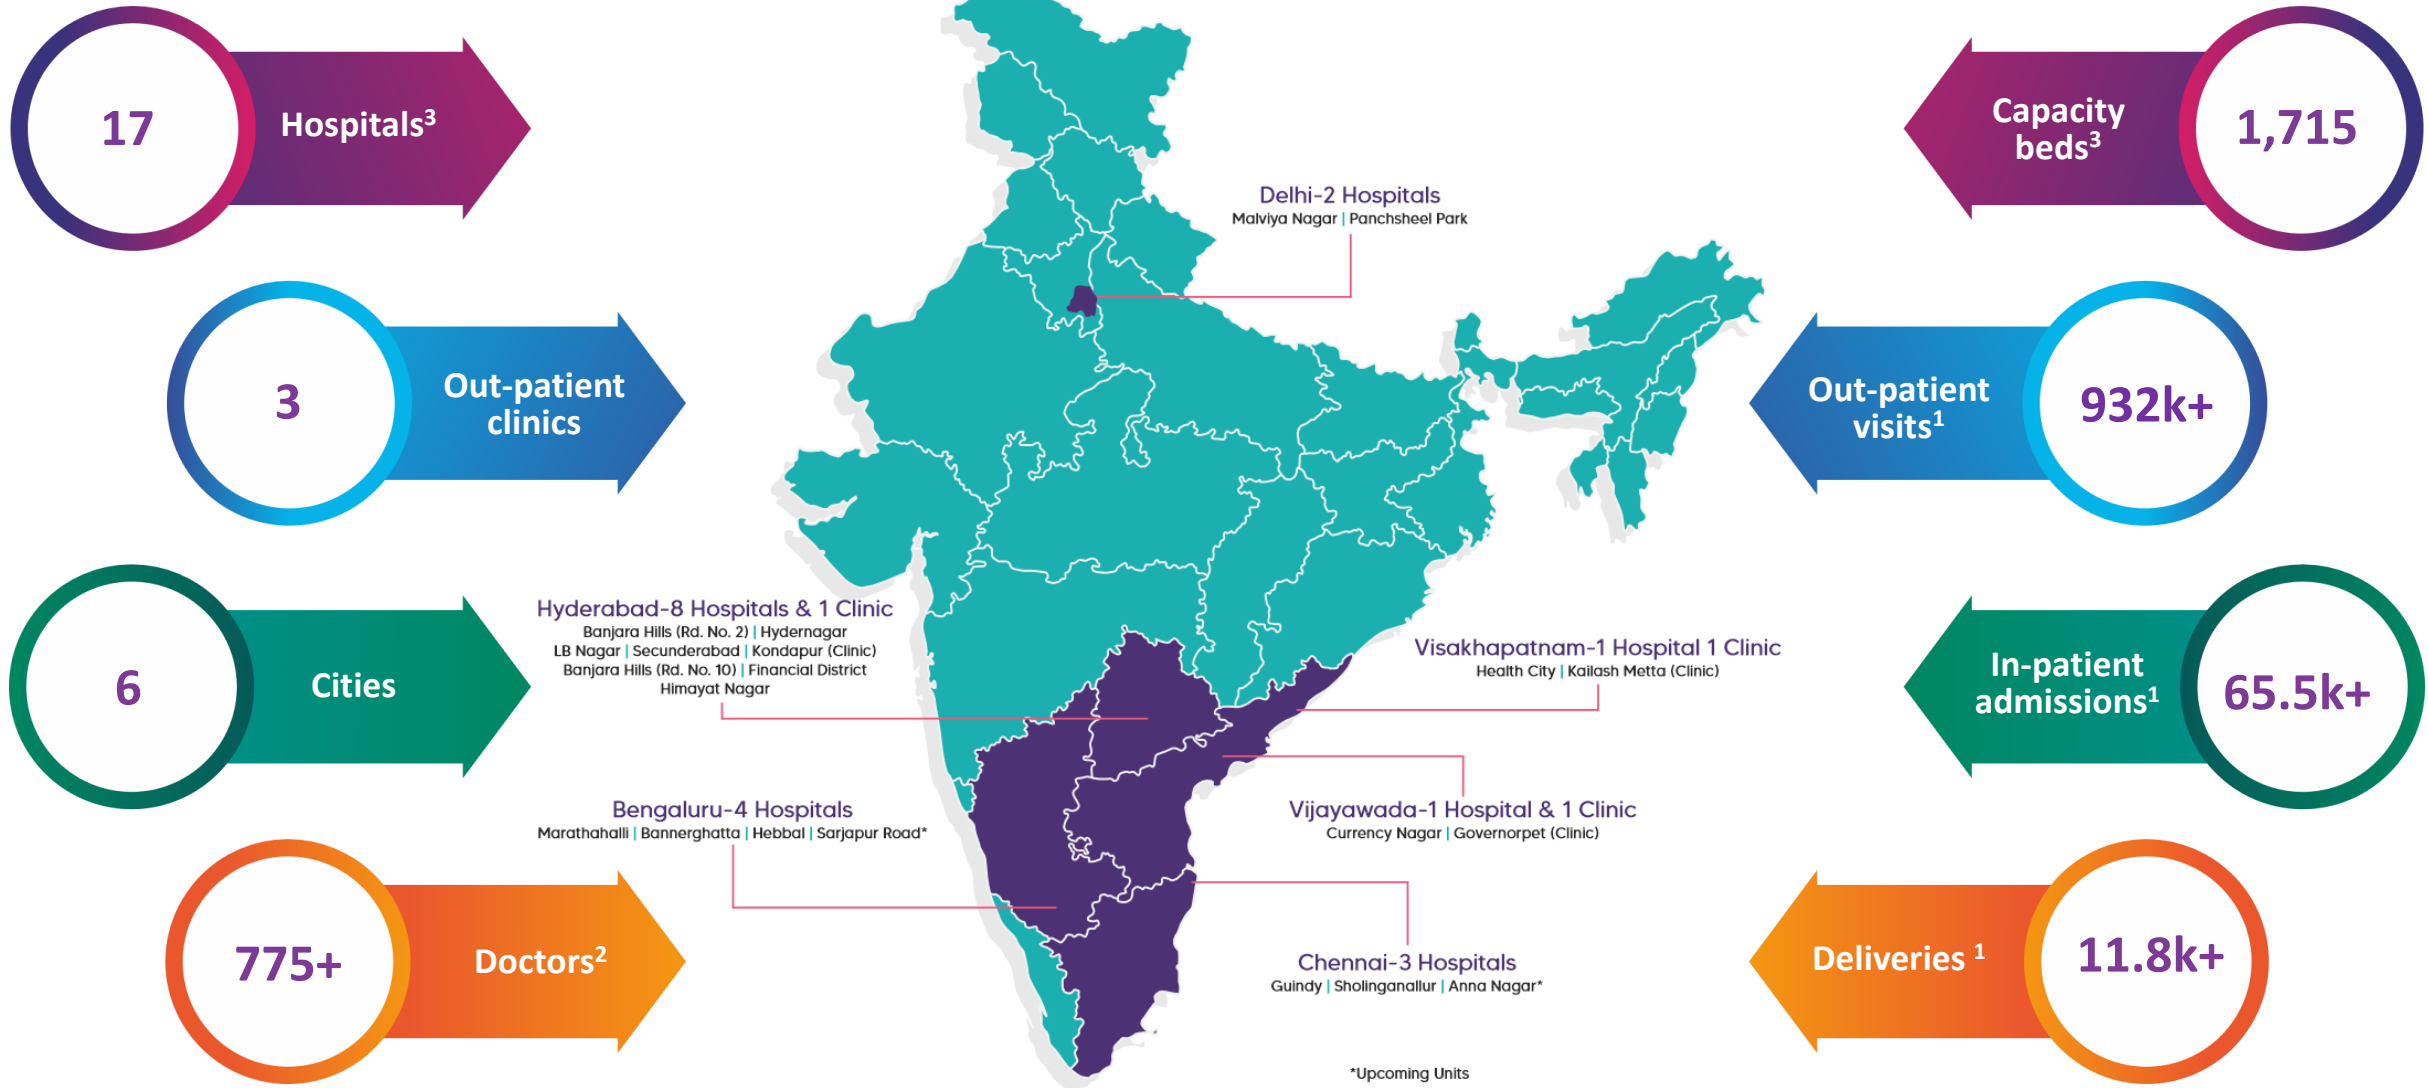

Largest chain of comprehensive pediatric care with cutting-edge quaternary care services

Largest pediatric training program in private healthcare in the country

Venturing into newer territories: Chennai and Visakhapatnam

Pioneering the way: The first pediatric and fertility hospital to earn prestigious JCI accreditation in the country

Footprint of Rainbow Hospital

Note: ¹ Numbers for 9M FY24; ² Including full time residents and DNB; ³ Rainbow Himayatnagar, Hyderabad (60 beds) commissioned on 4th January, 2024

An insight into the Rainbow approach

Dr. Ramesh Kancharla

Pediatric Healthcare Visionary

Chairman & Managing Director

Dr. Ramesh comes from an agricultural background from a village in Andhra Pradesh, India where the accessibility to healthcare was very poor. This motivated Dr. Ramesh to pursue medical education

Garnered rich experience in pediatric gastroenterology and liver disease at best pediatric hospitals in the United Kingdom and got exposed to the nuances of pediatric healthcare model at these hospitals

Lack of quality pediatric healthcare in the country and his resolve that no child should suffer due to lack of dedicated medical facilities led to the foundation of Rainbow Children's Hospitals in 1999

Rainbow is currently the country's largest pediatric hospital chain with 17¹ hospitals spread across 6 cities

Bestowed with a Lifetime Achievement Award at the Times Health Excellence Awards, 2022 for exemplary contribution to pediatric healthcare

A novel approach in pediatrics healthcare services

Ability to conceptualize, create and operate specialized children's hospitals

Children Centric Hospitals

Children centric environment and soothing interiors help in children to recover faster

Allocation of significant portion of capex towards interiors of hospitals for creating congenial environment

Doctor engagement model fostering loyalty and sustainability with an institution-first approach

- **775+ full time doctors**
- **A number of doctors trained or possess qualifications from the UK, USA, Canada, Australia**
- **Modern infrastructure and clinical back-up to provide quality care**

- **Recognised as MRCPCH Examination Centre**
- **Recognised as training center¹ by National Board of Examinations**
- **Leading training program in India approved by National Board of Examinations**

- **Retainer/Support in beginning years**
- **Competitive compensation and rewards**
- **Opportunities to grow, absorb in the Rainbow network**
- **Multidisciplinary approach to create comprehensive clinical environment and better work life balance**

- **Two decades of pioneering work**
- **One of the advanced institutes offering all Paediatrics specialities under one roof including quaternary care**
- **One of the leading comprehensive perinatal centres**

Note: ¹ For offering training in Pediatrics, Neonatology, Pediatrics Intensive Care, Pediatric sub specialties, Obstetrics and Gynaecology

The specialist in comprehensive children's care

Full suite of Pediatric offerings

Pediatric Secondary Care

- Pediatric outpatients
- Immunizations
- Developmental Screening
- Acute and seasonal illness

~1/3 of Beds Allocated
to Critical Care

Pediatric Tertiary Intensive Care

- Care of preterm babies with low/extremely low birth weight
- New born emergency transports
- Neonatal surgical Services
- Advanced ventilation including HFOV
- Pediatric neurocritical care services
- ECMO services

2 Hospitals
Accredited by JCI#

Pediatric Multi-specialty & Quaternary Care

- Pediatric Surgery, urology and minimal invasive surgery
- Pediatric Cardiology and cardiac surgery
- Pediatric Neurology and neuro-surgery
- Pediatric Haemato-oncology
- Pediatric Gastroenterology and liver diseases
- Pediatric Nephrology
- Pediatric Pulmonology and allergy
- Pediatric transplantation (liver, kidney, bone-marrow)
- CRRT, plasmapheresis, hemodialysis

12 Hospitals
Accredited by NABH

Comprehensive perinatal care provider, with synergies between paediatric and perinatal services

Comprehensive services for all pediatric care needs

Pediatrics

- 24*7 full spectrum of Pediatric multi speciality cover with level 4 NICU care

Coordinated handholding for both perinatal and pediatric services

Ease of seeing both pediatrician and obstetrician

Accessibility/nativity/comfort/ knows the system/strong recommendation from pediatrician

Full range of fetal service included cardiac echo/neonatologist consultation prior to delivery

- Comprehensive perinatal service
- 24/7 Obstetrics, anesthesia, blood bank
- Maternity ICU

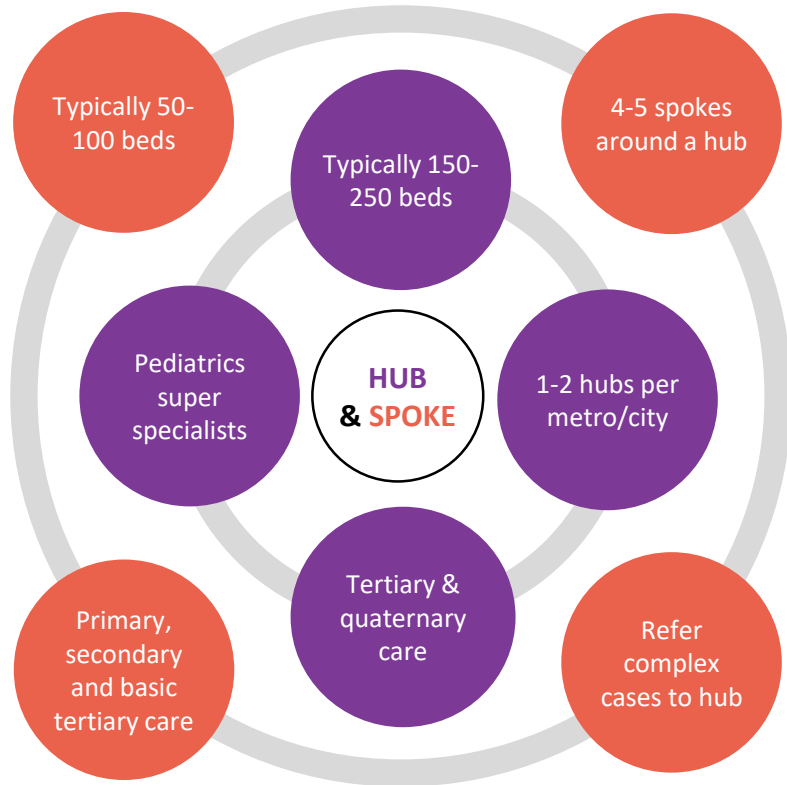

Obstetrics, Fetal Medicine & Fertility

Fully integrated maternity care and fertility services

Hub and Spoke approach to **optimise delivery of patient care services at scale**

City level hub and spoke model

Accessibility of super-specialty at hubs, general pediatrics at spokes

Regional level “South Connect” model

Regional spokes at 200-250 kms from city hubs

Regional spokes to provide high quality Pediatric, obstetrics and gynaecology care at tier-II cities and act as connecting bridge to address a large market

- Robust transport network to save sick new born and children from districts
- Establish Pediatric sub-specialty outreach clinic at districts
- Provide emergency service for maternal and Pediatric patients

Financially prudent expansion

Network effect and synergies enhance operational efficiencies

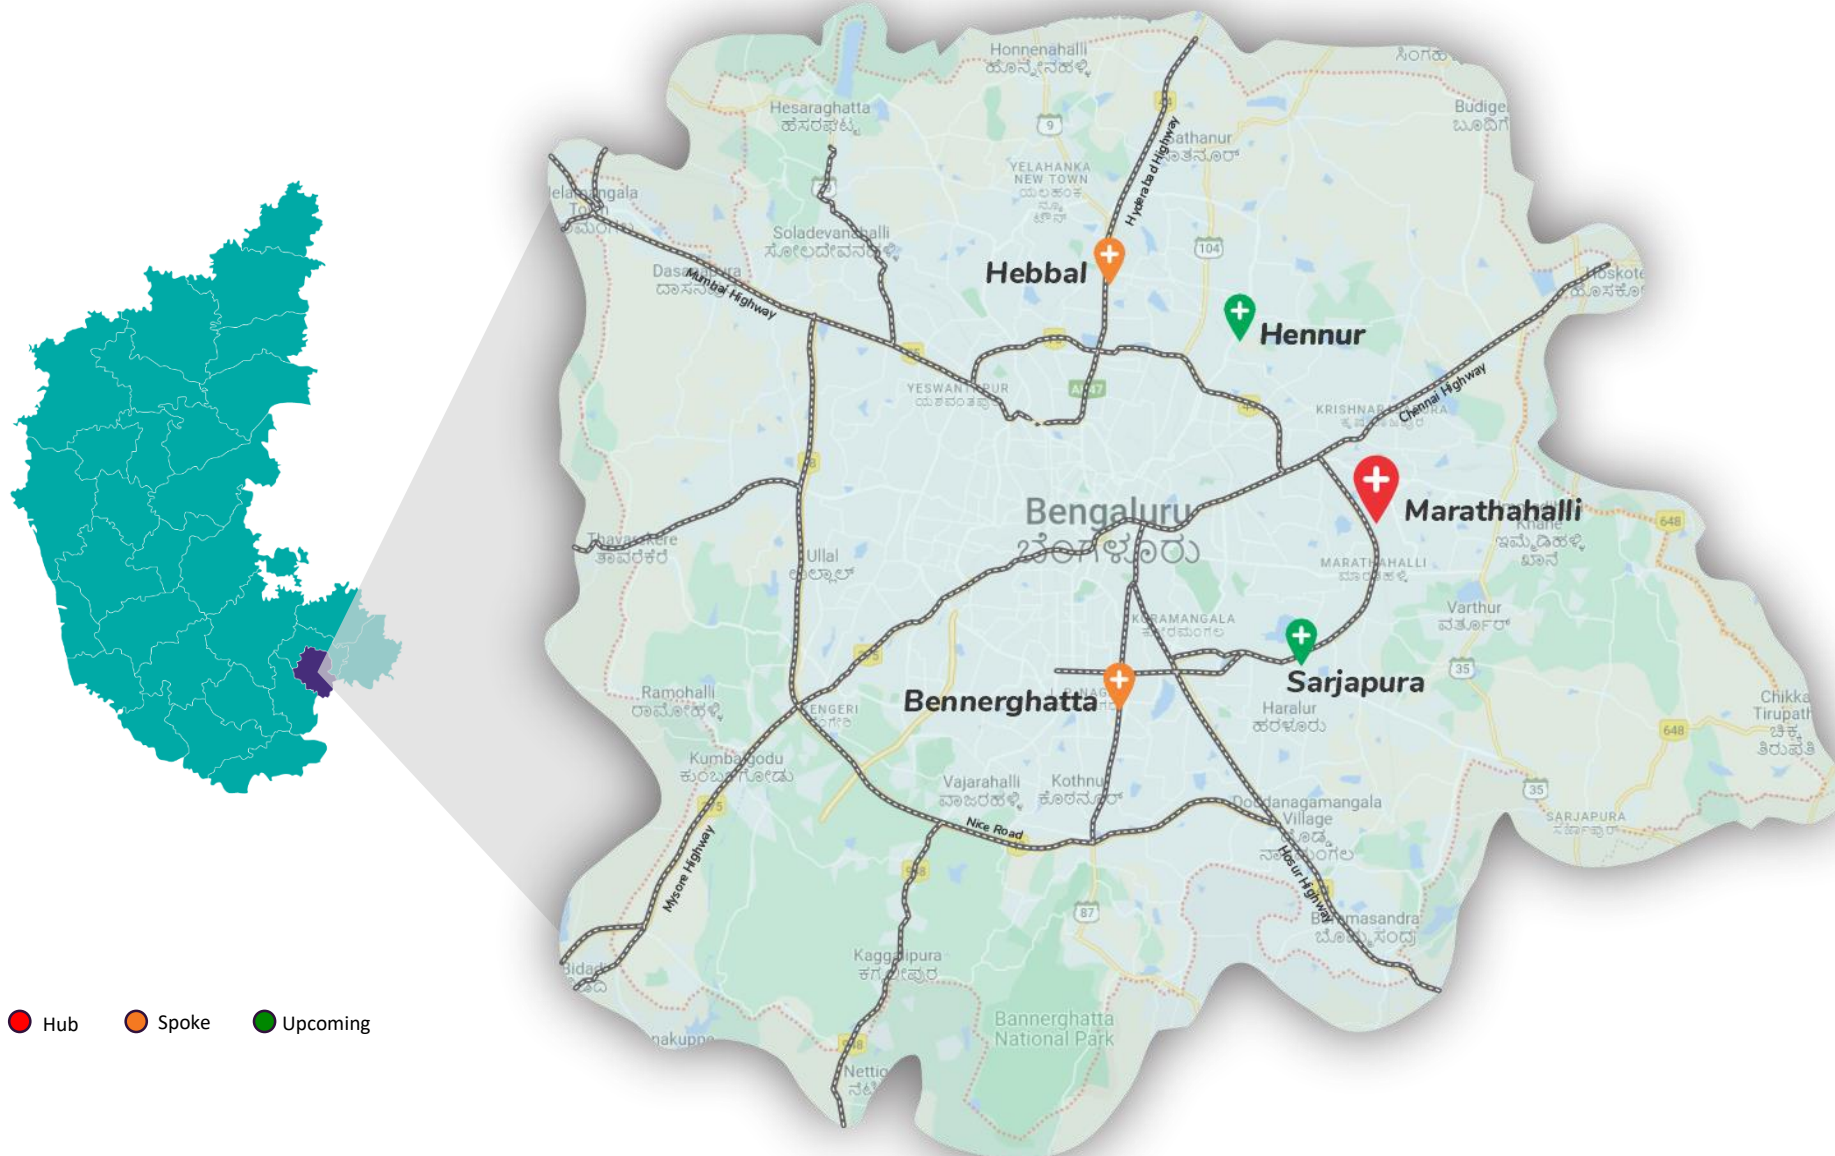

Hyderabad - Hub & Spoke Model

● Hub ● Spoke

- Hub Hospital (Banjara) is centrally situated, providing accessibility from all part of the city
- Spokes hospitals are situated at areas experiencing rapid growth and development
- Strategically located to ensure convenient access for nearby towns and cities

Bengaluru - Hub & Spoke Model

- Hub Hospital (Marathahalli) is situated on the Outer Ring Road, at the heart of Bengaluru, ensuring convenient access from every part of the city.
- Spokes hospitals are situated at areas experiencing rapid growth and development
- Strategically positioned to ensure convenient access for nearby towns and cities

Robust governance framework

High Governance Standard

Key Developments

Key developments

- Commencement of new 60 beds hospital at Himayatnagar, Central Hyderabad¹

- Central Hyderabad Hospital is Rainbow's 8th hospital in Hyderabad and is strategically located in the densely populated and commercially important area of central Hyderabad.
- Newly commissioned 60 beds hospital will provide consultant led 24X7 emergency care in pediatrics and obstetrics, outpatient services and level 3 Neonatal and Pediatric intensive care services
- This hospital will further strengthen company's Hub and Spoke network at Hyderabad. With this new hospital, Rainbow will have combined 890 beds at Hyderabad
- This hospital will become an important spoke hospital to complement the Hub hospital at Banjara Hills, which is already ranked as a premier hospital for pediatrics in the city of Hyderabad and only pediatrics' hospital in country to receive JCI accreditation

¹Commissioned on 4th January, 2024.

Airlifts toddler with kidney failure from Raipur to Bengaluru

A 6 months old baby experienced Diarrhea while the family returned from **Canada**. Diarrhea worsened the kidney functions.

The infant was diagnosed with Haemolytic Uremic Syndrome(HUS), a medical condition presents with high blood pressure and kidney failure.

Our team promptly responded to the parents' request to airlift the infant and stabilized the baby at the local hospital in Raipur.

Later, the infant was shifted to Rainbow Children's Hospital, Marathahalli - PICU and Pediatric Nephrology department **the hub hospital in Bengaluru** - The baby was **ventilated**, had number of **plasma exchanges and dialysis** and made full recovery in 20 days.

Airlifts toddler with kidney failure from Raipur to Bengaluru

Hospital airlifts critically-ill toddler from Raipur to Bengaluru

HANS NEWS SERVICE
BENGALURU

The infant was diagnosed with Haemolytic Uremic Syndrome (HUS), a severe medical condition characterised by high blood pressure and kidney failure

IN a critical medical case involving a six-month-old infant, the Rainbow Children's Hospital in Marathahalli, Bengaluru swift action and informed medical decision facilitated the urgent airlift of the baby from Raipur to Bengaluru to receive specialized medical services.

Under the guidance of Dr. Rakshay Shetty, Head of Paediatric Intensive Care Services, Marathahalli, the team that involved Dr. Deepak Ramesh, Consultant-Paediatric Intensive Care Unit at Rainbow Children's Hospital, Marathahalli, and Dr. Anupam Jaiswal, Consultant Paediatric Intensivist and Paediatrician, Bannerghatta Road gave the infant the necessary timely care and attention to stabilize her condition and ensure a smooth transition to the Rainbow Children's Hospital in Bengaluru.

The infant started experiencing diarrhoea while the family was visiting Raipur from Canada. However, the situation became complicated as this diarrhoeal disease escalated to rapidly worsening kidney functions. Understanding the significance of time and the critical nature of the situation, the expert team of doctors and staff at Rainbow Children's Hospital in Marathahalli quickly re-

sponded to the parents' plea to air-lift the infant.

The infant was diagnosed with Haemolytic Uremic Syndrome (HUS), a severe medical condition characterized by high blood pressure and kidney failure. While initial medical support was provided at a local private hospital in Raipur, the critical progression of the case necessitated specialized medical interventions such as haemodialysis and plasma exchange therapy, especially in the case of infants. Recognizing the importance of time and the critical nature of the situation, the expert team of doctors and staff at Rainbow Children's Hospital in Marathahalli promptly responded to the parent's re-

quest to airlift the infant.

Speaking about the challenges involved in the case, Consultant-Pediatric Intensive Care Unit at Rainbow Children's Hospital, Dr. Deepak Ramesh said, "Transporting an unstable infant with rapidly fluctuating blood pressure and compromised breathing due to excessive fluid in the body is difficult even by road transport. Air travel introduces changes in ambient pressures, which can profoundly affect the human body. In a critically ill child, this can lead to rapid deterioration. Additionally, a fixed-wing aircraft cannot be stopped midway and parked by the side for immediate assistance. It was challenging to safely transport the child in a

confined space, far from any help."

"Fortunately, the child only required monitoring during transport since the transport team of Dr. Anupam Jaiswal and Veeresh Tuttupad had stabilized the patient at the local hospital in Raipur before embarking on the flight. Prepared for any exigency that might arise, the medical professionals diligently continued the ongoing treatment without necessitating additional support during the flight," he added.

"We had to prepare and pack delicate equipment such as ventilators, ultrasound machines, monitors, etc., along with all the medications, ensuring their safe transportation on a commer-

cial airplane," said Dr. Deepak, a specialist on the team. "Moreover, connectivity to Raipur is limited, and the earliest available flight was at 7:30 am. So we had to prepare everything in advance on a Saturday night, ensure compatibility of all equipment and connections

for use inside the aircraft, and be prepared for an early morning take-off the next day. Once our team arrived in Raipur, they assessed the child's situation, requested and conducted essential investigations necessary for safe air transport. This ensured that the return jour-

ney was smooth without any complications"

The infant girl is currently in the Paediatric Intensive Care Unit (PICU) at Rainbow Children's Hospital in Marathahalli, receiving specialized care from the PICU and Paediatric Nephrology teams.

EXPRESS NEWS SERVICE
@Bengaluru

A six-month-old child from Raipur in Chhattisgarh was airlifted to a hospital in Bengaluru on July 2 after being diagnosed with Hemolytic Uremic Syndrome (HUS), a severe medical condition characterised by high blood pressure and kidney failure.

The baby, who was travelling to Raipur with family from Canada, started experiencing diar-

rhoea which rapidly escalated to worsening kidney functions. Doctors at Rainbow Children's Hospital, Marathahalli, responded to the situation and the baby was airlifted to Bengaluru last week. They observed that the baby needed specialised medical interventions such as hemodialysis and plasma exchange therapy.

"Transporting an unstable infant with rapidly fluctuating blood pressure and compromised breathing due to excessive fluid

in the body is difficult even by road. Air travel introduces different challenges as changes in ambient pressures can lead to rapid deterioration of health in case of a critically ill infant," Dr. Deepak Ramesh, consultant-paediatric, ICU, Rainbow Children's Hospital explained.

Due to limited connectivity to Raipur, doctors prepared everything a day in advance. Packing delicate equipment such

as ventilators, ultrasound machines, monitors along with all the medications was done ensuring compatibility of all equipment and connections for use inside the aircraft, and be prepared for an early morning take-off the next day. The return journey was smooth and the baby continues to be in the paediatric ICU at the hospital receiving appropriate care.

Doctors explained that HUS is

a condition in which patients experience progressive kidney failure, along with symptoms such as blood-stained urine, body swelling due to fluid accumulation, high blood pressure, breathing difficulties, seizures, and a sudden drop in haemoglobin and platelet levels. When these symptoms occur together, they can lead to various complications and become life-threatening within a short period unless immediate medical attention is sought.

FROM RAIPUR

Infant suffering from severe health condition airlifted to city

Child With Ruptured Brain Arterio-venous Malformation

- 10 years old child presented with episode of left side seizures.
- The child was diagnosed with Ruptured Right Frontal Arterio-venous Malformation (conglomerate of arteries and veins in brain)
- Digital Subtraction Angiography (MRI) revealed compact nidus (hematoma/blood clot)
- After counselling, patient underwent surgical excision of the AVM.
- Patient recovered well in postoperative period with no neurological deficit
- Was monitored and managed for strict control of hypertension
- Discharged on Day 4 post surgery and patient doing well on follow-up

Child With Ruptured Brain Arterio-venous Malformation

Woman who had 9 abortions, becomes a Happy Mother

Patient 32 years visited us, a known case of PCOD, with a history of recurrent pregnancy loss. She had **9 previous abortions** in the first trimester due to a unique condition called anti phospholipid antibody syndrome (APLA).

This is an unusual condition in which there is a tendency to form blood clots in the blood vessels resulting in poor fetal growth and demise.

In the current pregnancy, she followed up with **Birthright by Rainbow**. By putting the patient on appropriate medications, personalized care, diet and management of bleeding during pregnancy, the pregnancy could be prolonged till 34 weeks. She was admitted twice to the hospital for heavy bleeding but managed successfully with any harm to baby.

Delivered a healthy baby of 2.08 kgs.

Child with breathing issues recovered with cardiac surgery

- 4 year old child presented with breathing problems with significant stridor for 2 weeks
- Child was admitted multiple times at local hospitals and was referred since symptoms were not improving.
- We realized child was having an underlying cardiac conditions and underwent CT Angiogram which revealed pulmonary sling (compression of wind pipe behind distal trachea) resulting in breathing difficulty
- Cardiac surgeon at our cardiac hospital performed the re-implantation surgery to connect left pulmonary artery to main pulmonary artery with end to side anastomosis
- Child is doing well on follow up with no breathing issues (no stridor)

Chest X-Ray @5th admission

CT Angina

Bronchoscopy

Fructose 1,6 bis phosphate deficiency

- 3 day old child was admitted with metabolic acidosis hypoglycaemia with high lactate levels.
- Diagnosed as Fructose 1,6 bis phosphate deficiency after extensive investigation.
- This is a very rare case and usually present when the baby starts on weaning food after six months when fruits are introduced to the baby.
- The family was counselled about the natural history of the condition. The baby is now doing well and on regular follow-up

About Us

Rainbow network comprises of 17¹ hospitals and 3 clinics in 6 cities, with a total bed capacity of 1,715¹ beds. Our Pediatric services under “Rainbow Children’s Hospital” includes newborn and pediatric intensive care, pediatric multi-specialty services, pediatric quaternary care (including organ transplantation); whereas our women care services under “Birthright by Rainbow” offers perinatal care services which includes normal and complex obstetric care, multi-disciplinary fetal care, perinatal genetic and fertility care along with gynecology services.

Rainbow Children’s hospital built on strong fundamentals of multidisciplinary approach with a full-time consultant led clinical service along with 24/7 commitment in a child centric environment. The company follows a hub-and-spoke operating model where the hub hospital provides comprehensive outpatient, inpatient care, with a focus on tertiary and quaternary services while the spokes provide emergency care in pediatrics and obstetrics, large outpatient services and comprehensive obstetrics, pediatric and level 3 NICU services. This model is successfully operational at Hyderabad and is gaining traction in Bengaluru. The endeavor is to replicate this approach in Chennai and across the National Capital Region. Subsequently Rainbow intends to expand into tier-2 cities of Southern India.

Rainbow embraces a unique doctor engagement model, where doctors work exclusively on a full-time, retainer basis. The doctors work in teams and have 24/7 commitment, which is particularly important for children’s emergency, neonatal, pediatric intensive care services and to support pediatric retrieval services. The Company also operates the country’s largest pediatric DNB training programme in private healthcare, offering post graduate residential DNB and fellowship programme.
